## **DETAILED ACTION**

### ***Claim Objections***

Claim 22 is objected to because of the following informalities: in claim 22 line 14 "full" should be "fuel". Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-41 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Ruth (USPN 6,158,972).

Art Unit: 3746

Ruth discloses a fuel pump comprising a pump housing (12) comprising an inlet (the left 76 in Fig. 1) having an inlet nozzle (56) with a check valve (60) therein, a first pump chamber (22) having a diaphragm (20) which is biased by a spring (78) mounted between the pump housing and the diaphragm, a second pump chamber (32) having a diaphragm (28) which is biased by a spring (80) mounted between the pump housing and a cover (26), and an outlet (the right 76 in Fig. 1) having an outlet nozzle (58) with a check valve (62) mounted therein. There is also a valve (92) intermediate the first and second pump chambers.

Claims 1, 2, 7-10, 13 and 18-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Grinsteiner et al.

Grinsteiner et al discloses a fuel pump having first (30) and second (53) pump chambers with an inlet nozzle (16) having a check valve 928) mounted therein, a valve (39) mounted between the pump chambers and a diaphragm (34) in the first pump chamber.

### ***Conclusion***

This is a continuation of applicant's earlier Application No. 09/344,029. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
